

A4 A3 AND A5 PAPER

Sublimation paper ream for soft and hard applications like t-shirts, hats, cards, mugs, and other products; providing a coating that instantly dries, with a high transfer performance of 98% and consistently providing excellent quality.

FEATURES:

- Quick dry
- High yield
- Waste reduction
- Quick ink absorption
- Increased dye gas production
- Faster transfer
- High color gain
- Instant dry coating
- Less residual ink, up to 98% transfer

COMPOSITION:

- Fiber
- Ground polypropylene, modified amine cellulose
- Hydroxypropyl cellulose
- Sodium carboxymethyl cellulose
- Cationic polyacrylamide
- Silica
- Surfactant
- Water

Qualitexpaper offers excellent stability at the moment of printing with the capacity of absorbing high amounts of ink.

- The paper allows the heat to transfer the gas in a penetrating, effective and deep way.
- Transfer of more vivid and vibrant colors.
- Easy to work.
- Makes the ink residue very low on printing (ink waste reduction).
- It saves production costs.
- To improve performance, it is recommended to have at least **70% polyester** on the fabric.
- Avoid the ghost effect.
- Perfect for creating countless designs to be transferred.
- Available in reams and boxes.
